

## Bollards | Concrete Infill Bollard

**Material:**

Mild steel from recycled sources.

**Dimensions:**

As standard these bollards are 168mm diameter and 1500mm overall length, but they can be manufactured in other sizes to suit individual site needs

**Colour**

As standard these bollards are finished galvanised, but they can be polyester powder coated in any standard RAL or BS colour

**Adaptations**

Chain eyes or lugs can be fitted so that the bollards can be made into barriers or gate posts. Reflective bands and machined recesses can be added to improve visibility. Bollards can be made to meet DDA guidelines. Bollards can be manufactured to completely bespoke specifications if required.
